

WATCHSHIELD AI

India's Privacy-First Edge-AI Security Platform

Real-time facial recognition for retail theft prevention and women's safety DPDP-compliant | Edge-only | B2B2G Police Alert |
■37,000 Cr market

■37,000 Cr

Market (TAM)
India Video Surveillance 2025

18-22%

CAGR
AI-CCTV + FRT (NextMSC / IMARC)

■23,000 Cr

Annual Retail Loss
World's highest shrink rate 3.1%

■7,712 Cr

Nirbhaya Fund
Women's safety govt. budget (active)

SEED ROUND — ■4-6 CRORE | 15-20% EQUITY | MAY 2026

THE PROBLEM

India is losing ■23,000 crore a year to retail theft — and women face daily harassment with zero real-time response capability.

The Pain	Current Reality	Cost / Impact
Retail Shrinkage	CCTV footage reviewed AFTER theft. No real-time alert. No repeat-offender tracking.	■23,000 Cr/yr lost. India's shrink rate 3.1% — world's highest (Global Retail Theft Barometer)
Women's Harassment in Public Spaces	No AI-powered real-time detection. Police response takes 20-45 minutes. Manual complaint-only process.	NCRB 2022: 4.45 lakh crimes against women reported. 65% in public/semi-public spaces. Gross under-reporting.
Broken Police Technology	NCRB AFRS tender extended 12+ times since 2019. Police lack real-time watchlist matching. Evidence retrieval takes days.	~■200+ Cr government budget allocated but mired in procurement delays. Criminals walk free.
Chinese CCTV Ban (April 2026)	Hikvision, Dahua banned under STQC rules. 33% of India's camera market (Chinese brands) is now a vacuum.	Critical infrastructure now insecure. Indian retailers scrambling for alternatives. Window is NOW.

BOTTOM LINE: India has 2-2.5 million commercial cameras watching its retail stores — but most are dumb recorders. Zero intelligence. Zero prevention. Zero real-time action.

OUR SOLUTION

WatchShield AI — Privacy-first, edge-based facial recognition that turns existing CCTV into real-time intelligent security.

Feature	How It Works	Why It's Different
Real-Time Watchlist Matching	CCTV feeds processed on-device (Jetson Orin NX). ArcFace embeddings matched against court-supplied criminal/wanted list in <2 seconds.	No cloud dependency. No biometric data leaves the store. DPDP-compliant by design.
B2B2G Police Alert	Encrypted notification sent to police control room API. Only: match probability + timestamp + camera ID. Zero personal data transmitted.	Only product in India with this architecture. Sidesteps police procurement complexity entirely.
Women's Safety Module (Phase 2)	Pose estimation + audio AI detects aggression, harassment patterns, stalker re-identification. One-tap SOS with nearest CCTV snapshot.	No competitor has productised this. Direct fit with ₹7,712 Cr Nirbhaya Fund.
DPDP Audit Trail	Every match, every alert, every data access logged immutably. Role-based access. Auto-deletion after purpose fulfilled.	No incumbent has built DPDP-native architecture. Compliance is the moat.
Bias Audit Certification	First-party bias study on Indian skin-tone + gender + age dataset. Published openly.	No competitor has done this. Builds legal defensibility and brand trust simultaneously.

THE CORE INSIGHT: The moat is NOT the AI models (open-source). The moat is DPDP-by-design architecture + bias audit + B2B2G police API — none of which any incumbent has built.

MARKET OPPORTUNITY

India is the fastest-growing AI surveillance market in the world — and the most structurally underserved.

■37,000 Cr TAM India Video Surveillance 2025 (Mordor)	■3,500 Cr SAM India AI-CCTV + FRT 2025	■300 Cr SOM Y5 1-2% SAM capture — focused retail + Tier-2	21.8% CAGR India AI CCTV 2023-2030 (NextMSC)
--	---	--	---

Segment	Addressable Market	Entry Strategy	Timeline
Organised Retail (Phase 1)	~18,000+ Reliance stores; 300+ DMart; thousands of jewellery chains, banks, malls	Direct enterprise SaaS at ■3,000-8,000/cam/month. Target HQ purchase decisions.	Year 1-2
Women's Safety — Private (Phase 2)	2,000+ malls, 700+ metro stations, 600+ campuses	Add-on SaaS module ■15,000-40,000/location/month. ESG positioning.	Year 2-3
Women's Safety — Govt (Phase 2)	■7,712 Cr Nirbhaya Fund; ■2,919 Cr Safe City project, 8 metro cities	Subcontractor to L&T; / BEL / Honeywell prime contractors.	Year 2-4
Smart City AI-Overlay (Phase 3)	84,000 Smart City cameras with O&M; contracts; 100 cities	SaaS licence to Smart City SPVs and municipal corps.	Year 3-5
Defence / CAPF (Phase 3)	MoD, CISF, BSF perimeter security budgets	iDEX ADITI route; defence SI partnerships.	Year 4-6

MARKET VALIDATION & TRACTION

The market has already validated this: here is what incumbents have proven — and the gap we fill.

Proof Point	Source	What It Means For Us
Staqu charges ■2,000-8,000/cam/month to Indian retailers with 'zero customer churn'	Staqu (company stated, EFY India interview)	Pricing validated. Retail willingness to pay confirmed. We enter at same price with better privacy architecture.
Staqu raised ■11 Cr pre-Series A at just ■40 Cr ARR	BW Disrupt / Tracxn, April 2022	Capital efficient path exists. ■4-6 Cr seed at our stage is achievable with similar traction.
Videonetics hit ■78.8 Cr ARR (FY25) bootstrapping to Series B	Getlatka / Tracxn	Revenue ceiling in Indian video analytics is real and significant. This is not a niche play.
India's retail shrink rate is world's highest at 3.1%; security spend is below global average	Global Retail Theft Barometer (Centre for Retail Research)	Structural under-investment in security = guaranteed demand when ROI is proven.
Hikvision/Dahua banned April 2026; domestic brands now hold >80% market share	Medianama / PTC News / Whalesbook, April 2026	Hardware vacuum = software-layer opportunity. Timing is perfect.
Delhi Safe City: ■798 Cr for 10,582 CCTVs + AI/FRT command centre with 3-lakh suspect DB	IFF / PIB government documents	Government has the budget and the will. We access it via Safe City SI subcontract.

BUSINESS MODEL

Multiple revenue streams. Retail SaaS as the cash engine. Government as the scale multiplier.

Revenue Stream	Pricing	Target	Gross Margin	Phase
B2B SaaS — Per Camera/Month	■3,000-■8,000/cam/mo	Retail chains, malls, banks	65-70%	Phase 1 (NOW)
Edge Hardware Bundle	■75K-1.5L device + ■2K/mo SaaS	SMB, Tier-2 retail	10-15% hardware; 65% SaaS	Phase 1
B2B2G Police API Licence	■50K-2L/yr per jurisdiction	Police forces via retailer	80-85%	Phase 1-2
Women's Safety SaaS Module	■15K-40K/location/mo	Malls, campuses, metros	70-75%	Phase 2
Govt / SI Technology Licence	■500-1,500/cam/yr	Safe City SIs, municipal corps	75-80%	Phase 2-3

Unit Metric	Value	Source / Benchmark
ARPU (target avg.)	■4,500/cam/month	Staqui range ■2,000-■8,000; we target mid-premium with DPDP moat
Customer Acquisition Cost	■3-8 lakh per logo	Indian enterprise security B2B; direct + channel hybrid
Lifetime Value (target)	■25-60 lakh per logo	LTV:CAC > 5:1 at scale; 36-month min contract
CAC Payback Period	12-18 months	Acceptable for Indian enterprise SaaS
Gross Margin (blended)	62-68% at Year 3	Indian AI SaaS benchmark: 55-70%
Target Logo Churn	<8% annually	Staqui: zero churn (stated); Videonetics: multi-year govt contracts

COMPETITIVE LANDSCAPE

Incumbents have validated the market. None has our privacy-first, DPDP-native, edge-only positioning.

Company	Revenue	Key Clients	Edge-Only ?	DPDP-Native?	Retail SaaS?	Women's Safety?
Staqu Technologies	■40 Cr ARR	8 state police, retail	Partial	No	Yes	No
Videonetics	■78.8 Cr FY25	80+ airports, cities	No	No	Partial	No
Innefu Labs	■64 Cr FY24	Delhi Police, MHA	No	No	No	No
FaceTagr	Undisclosed	TN/AP/Telangana police	No	No	No	No
WatchShield AI (US)	Pre-revenue	Pilots signed	YES	YES	YES	YES

EVERY COLUMN MARKED 'YES' FOR US AND 'NO' FOR EVERY COMPETITOR = A CLEAR, DEFENSIBLE, UNCHALLENGED POSITIONING. THIS IS THE WHITESPACE.

FINANCIAL PROJECTIONS

Conservative model. Revenue-positive by Year 3. Capital-efficient path to ₹100 Cr ARR.

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Paying Cameras	200	800	2,500	6,000	12,000
ARPU (₹/cam/mo)	3,800	4,200	4,500	4,800	5,000
Retail SaaS ARR (₹ lakh)	91	403	1,350	3,456	7,200
Govt/SI Revenue (₹ lakh)	0	0	200	800	2,500
TOTAL REVENUE (₹ lakh)	121	463	1,650	4,406	9,900
Gross Margin %	52%	58%	64%	67%	70%
EBITDA (₹ lakh)	-180	-120	+80	+660	+2,200
Team Size	6-7	12-15	22-28	40-50	70-90

Round	Amount	Timing	Valuation	Use of Funds
Angel + iDEX SPARK	₹25L + ₹1.5-10 Cr	Now — Month 6	Pre-money ₹8-12 Cr	POC build, STQC cert, 2 LOIs, legal setup
Seed Round (THIS DECK)	₹4-6 Cr	Month 6-9	₹20-25 Cr post-money	Scale pilots to 200 cams, 4 hires, marketing
ADITI 2.0 (Non-dilutive)	Up to ₹25 Cr	Month 12-18	Non-dilutive	Women's safety module, defence expansion
Series A	₹25-40 Cr	Month 18-24	₹100-150 Cr post-money	Tier-2 expansion, SI partnerships, international

TEAM & EXECUTION ROADMAP

2 technical founders building the MVP. Critical hires locked before seed close.

Phase	Timeline	Key Milestones	Trigger to Next Phase
Phase 0 — Foundation	Month 0-3	DPIIT registration. iDEX SPARK filed. Working PoC on Jetson Orin Nano. 2-3 retail LOIs signed. Privacy counsel engaged.	1 signed pilot OR iDEX selection OR retail chain LOI for 100+ cameras
Phase 1 — MVP + Seed	Month 3-12	STQC certification. Deploy Pilot 1 (20-30 cams). B2B2G police API built. DPDP audit log complete. Seed closed. 200 cameras, █80L ARR.	█4 Cr ARR, <10% logo churn, 3 paying logos
Phase 2 — Scale + Women's Safety	Month 12-30	Women's safety module launched. Tier-2 city expansion (5 cities). Safe City SI partnership signed. Bias audit published. Series A closed.	█15 Cr ARR, SI contract signed, Series A █25-40 Cr closed
Phase 3 — Smart City + Defence	Month 30-60	Smart City O&M; AI overlay contracts. iDEX ADITI defence pilot. International expansion (UAE, SEA). █100 Cr ARR target. IPO preparation or strategic M&A.;	█50 Cr ARR, EBITDA positive, strategic or IPO path decision

Critical Hire	Month	Why Non-Negotiable
ML / Computer Vision Engineer	4-6	Core product is AI. Founders cannot build and sell simultaneously.
Enterprise Sales Lead (ex-Staqu/CP Plus/Hikvision channel)	5-7	Indian enterprise security sales requires existing relationships and channel trust.
Government Relations Advisor (ex-IPS/IAS)	8-10	Accessing state police, Safe City SIs, and iDEX without an insider is nearly impossible.

RISK MATRIX — INVESTOR TRANSPARENCY

Every real pitch discloses its risks. Here is ours, with mitigations.

Risk	Level	Mitigation	Investor Ask
DPDP regulatory tightening (penalties up to ₹250 Cr)	HIGH	DPDP-by-design architecture from Day 1. Privacy counsel retained. Phased compliance through May 2027 gives runway.	Introductions to privacy law firms
Algorithmic bias on Indian skin tones (potential false arrests)	HIGH	Own bias audit on Indian dataset before any police deployment. Mandatory human-in-the-loop. >95% confidence threshold.	Academic partner for bias research
Long enterprise sales cycles (12-24 months)	MEDIUM	Channel partnerships with ex-Hikvision/CP Plus distributors. Target HQ sales for multi-store rollout immediately.	Enterprise sales network access
Competitor (Staqu/Videonetics) adds privacy features	MEDIUM	First-mover window 12-18 months. Lock customers in 24-36 month contracts. Publish bias audit as irreversible credibility.	Help close first 2-3 anchor logos fast
Government procurement delays (NCRB AFRS pattern)	HIGH	NOT relying on direct police contracts Years 1-3. B2B2G model routes around procurement entirely.	None — deliberately excluded from model
Data breach / biometric leak	LOW	Edge-only: no central biometric database to breach. Only embeddings stored locally. Auto-delete post-purpose.	Security audit partner

SEED ROUND — ■4-6 CRORE | 15-20% EQUITY | ■20-25 CRORE POST-MONEY VALUATION

THE ASK

Use of Funds	Amount	Timeline	Expected Outcome
MVP Completion + STQC Certification	■70-90 lakh	Month 1-7	Certified, deployable edge-AI product. First 3 retail pilots.
Critical Hires (4 people)	■60-80 lakh/yr	Month 4-9	ML engineer, embedded engineer, sales lead, compliance officer.
Pilot Deployments (200 cameras)	■40-60 lakh	Month 5-12	3 paying logos, ■80+ lakh ARR, proof of product-market fit.
Legal + Compliance + Privacy Architecture	■15-20 lakh	Month 1-6	Full DPDP-compliant architecture. Litigation risk minimised.
Sales + Marketing + Channel Development	■25-35 lakh	Month 6-12	Channel partner signed. 2 enterprise logos closed.
Working Capital + Contingency (18 months)	■1.2-1.8 Cr	Ongoing	18-month runway to Series A trigger (■4 Cr ARR + 1,000 cameras)

18 months
